Full-stack developer experienced in building production applications that current scales above 3000+ active users across AI, automation, e-commerce, and data-driven systems. Comfortable working across the stack, from product interfaces and APIs to databases, automation pipelines, and AI integrations, with a focus on shipping functional products end to end.

WORK EXPERIENCE

Uphook.ai (Technical Intern)

Sep 2026 – Present

- Sourced job listings across 100+ companies, working with ATS platforms and job data to expand the platform's job inventory. Currently scaling at 10000+ users
- Working directly with the founder to build and improve the core recruiting platform on n8n, contributing across product engineering, backend systems, and data workflows.

Daga Groups (Software Developer Intern)

Feb 2026 - July 2026

- Built a Python-based Telegram automation bot using Gemini Vision AI for automated bill/invoice classification and data extraction, with Google Sheets API for structured storage.
- Prototyped a real-time voice AI agent, integrating Twilio (telephony), Deepgram (speech-to-text), and ElevenLabs (text-to-speech) into a single conversational pipeline

Aug 2025 – Oct 2025

Sunder Garments (Freelance)

- Built an end-to-end e-commerce platform, supporting web and mobile storefronts, for clothing articles and bulk orders
- Engineered the end-to-end e-commerce workflow, product catalog, checkout, and payment processing, and deployed the platform to production across web and mobile.

PROJECTS

The Teatime

- Developed an LLM agent system for autonomous news creation, enabling real-time factchecking and drafting that accelerated the editorial process by 100%.
- Engineered a dual-layer semantic deduplication system combining exact URL matching with semantic clustering to prevent duplicate stories.

P.L.A.T.E (Personalized learning and Assistance for Taste Enhancement)

- Built an AI-powered recipe assistant that generates personalized dishes, either by analyzing available ingredients through Fridge Mode or by offering new culinary inspirations via Explore Mode.
- Guides users with interactive, step-by-step cooking instructions, delivered in a chef-like style that makes the process engaging and easy to follow.

Smart Playlist

- Developed an AI-driven system that converts natural language prompts into personalized playlists,
- Built playlist search, save, and preference-management features on top of the natural-language prompt engine

EDUCATION

Bachelor Of Technology (B. Tech) - GPA 7.5

2021 - 2025

SRM University

SKILLS

- **Languages:** Python, JavaScript, TypeScript, SQL, PostgreSQL, C#
- **Frameworks:** ReactNative, Next.js, TailwindCSS, FastAPI, Node.js, MongoDB, PyTest,
- **Tools:** GitHub, Vercel, GCP, Docker, Unity, Redux, Flutter, Android Studio, Cursor, Claude
